User Stories and Tasks

Introduction

During the Pretoria Prime Recycling project, our team used Trello to organise user stories and tasks across different sprints. The user stories described what residents and team members needed from the service, while the tasks identified the work required to achieve those goals.

Sprint 5 – App Foundation

User Story 1: Resident Registration

As a new resident, I want to sign up with my name, address, and suburb so the app can match me to my local collection schedule.

Acceptance Criteria:

- The sign-up form saves the resident's name, address and suburb.
- The registration process captures the required information.

Tasks:

- Build the sign-up form UI with name, phone/email, address and suburb fields.

Progress: 100%

User Story 2: User Login

As a returning user, I want to log in with my phone number or email so I can access my account securely.

Acceptance Criteria:

- Login works with a phone number or email.

Tasks:

- Design the login screen UI.

Progress: 100%

Sprint 5 – Day 2: Onboarding and Home Dashboard

User Story 3: Onboarding Walkthrough

As a first-time user, I want a short onboarding walkthrough so I understand how the app helps me recycle correctly.

Acceptance Criteria:

- The walkthrough explains what the app does and how recycling works in 3–4 screens.

Tasks:

- Design 3–4 walkthrough screens explaining the app and recycling process.

Progress: 100%

User Story 4: Home Dashboard

As a resident, I want a home dashboard showing my next pickup date and quick links so I know what to do today.

Acceptance Criteria:

- The dashboard shows the resident's next pickup date.
- The dashboard has quick links to the main actions.

Tasks:

- Build the dashboard layout with the next-pickup card.

Progress: 100%

Sprint 5 – Day 3: Profile Setup

User Story 5: Edit Profile Details

As a user, I want to edit my address and household details in my profile so my pickup information stays accurate.

Acceptance Criteria:

- Users can edit their address and household details.
- Changes are saved and displayed on the profile.
- The updated address is used for the user's pickup schedule.

Tasks:

- Build profile edit screens for address and household details.
- Add validation so address and suburb fields cannot be empty.
- Connect the saved address to the user's pickup schedule.

Progress: 100%

Sprint 5 – Day 5: Connecting the App Foundation

User Story 6: Complete Registration-to-Dashboard Journey

As a new resident, I want to move smoothly from signing up to seeing my home dashboard, so that I can start using the recycling service without getting lost.

Acceptance Criteria:

- Sign-up, login, onboarding, dashboard and profile screens are linked in the correct order.
- A new user can move from sign-up to the dashboard without errors.
- Peer review is completed and the Product Owner accepts the foundation.

Tasks:

- Link the sign-up, login, onboarding, dashboard and profile screens.
- Test the full new-user journey.
- Fix bugs or layout issues found during testing.

Progress: 0%

Sprint 6 – Core Recycling Experience

User Stories:

- As a resident, I want to search or browse a recycling guide by item so I know which bin it goes in.
- As a resident, I want to scan or photograph an item so the app suggests how to dispose of it.
- As a resident, I want to request a special pickup, such as e-waste or bulky items, so I can dispose of items outside the normal schedule.
- As a resident, I want to see my area's weekly collection calendar so I know which day is recycling or general waste.
- As a resident, I want a reminder the evening before collection day so I don't miss putting my bin out.

Progress: 0%

Sprint 7 – Engagement and Improvements

User Stories:

- As a resident, I want to see rewards/prices for consistent recycling so I stay motivated.
- As a resident, I want to see my household's recycling impact, including kilograms saved and CO_2 reduced, so I feel the value of participating.

- As a resident, I want to redeem prizes for local vouchers or discounts so there's a tangible benefit.
- As a resident, I want to report a missed or incorrect pickup so the follow-up can be made.
- As a user, I want to set notification preferences for SMS, push notifications or email so I'm reminded the way I prefer.

Progress: 100%

Sprint 8 – Customer and Market Research

Tasks:

- Document the emotional benefit of community pride and environmental responsibility.
- Document financial and time-saving benefits for customers.
- Identify key WhatsApp community groups residents use.
- Identify key Facebook neighbourhood groups residents use.
- Map residents' daily routines, including home, school runs and stores.

Progress: 100%

Sprint 9 – Customer Research

Tasks:

- Research word-of-mouth referral patterns in the community.
- Compile customer research findings into a persona document.
- Validate the customer profile with three informal resident interviews.
- Identify the best day and time residents are most receptive.
- Present the customer research summary to the team.

Progress: 100%

Sprint 10 – Competitive Analysis and Positioning

Tasks:

- Research City Waste Removal's service offering.
- Research DIY recycling habits among residents.
- Build a competitor comparison table covering recyclables, pickup and cost.

- Draft a unique selling proposition (USP) statement.
- List three reasons the company is differentiated.

Progress: 100%

Sprint 12 – Feasibility, Financial and Risk Planning

Tasks:

- Get quotes for recycling bins and collection containers.
- Get quotes for sorting masks, gloves and safety equipment.
- Get quotes for household recycling bags.
- Get quotes for printed awareness posters.
- Estimate community poster and printing costs.

Progress: 100%

Sprint 14 – Financial and Risk Planning

Tasks:

- Finalise startup and operating cost estimates.
- Build a break-even and cash-flow projection for year one.
- Identify key financial and operational risks.
- Draft mitigation plans for the top three risks.
- Review findings with the team and decide on go/no-go criteria.

Progress: 100%

Sprint 15 – Pilot Launch and Review

Tasks:

- Finalise the pilot scope, including area, volume and timeline.
- Execute pilot collection runs.
- Track KPIs against the go/no-go criteria.
- Gather team and stakeholder feedback.
- Decide whether to scale up, adjust or halt the pilot.

Progress: 100%
